

*An SPT pool, Central Bangkok*

### ***Turn-key solutions: Standard rectangular domestic pools***

- Pool shells are of solid, steel reinforced premium strength concrete.
- Pool quality 4" x 4" ceramic tiles and sandwash coping.
- Automatic pumping.
- Special filter medium with 30 times the performance of sand, greatly reducing the regular service of the pool water, and pumping cycles. Does not need changing for many years.
- All pools can include fully automatic, self-cleaning saltwater chlorinator equipment that produces chlorine and algaecide at no cost.
- Pools are fitted with a correctly calculated number of underwater lights that takes into the account the refractive index of the depth of the water.
- Fully guaranteed for materials and workmanship.
- Short construction time.
- Convenient payment plan.
- Our customer service is second to none - we speak native English, German, French, and Thai, and our products carry up to a 20-year guarantee.

## Standard rectangular pools. Prices (January 2012)<sup>1</sup>

*An SPT pool, Pattaya*

Average depth 1.20m (flat bottom or simple slope).	Skimmer system	Infinity edge system with balance tank	ABS gutter all round with underground balance tank system
Surface	฿ per m <sup>2</sup>	฿ per m <sup>2</sup>	฿ per m <sup>2</sup>
Up to 32 m <sup>2</sup> *	12,900.00	13,900,00	14,700.00
33 to 99 m <sup>2</sup> *	13,500.00	14,750,00	15,950.00
100 to 199 m <sup>2</sup> **:	14,550.00	15,900,00	16,500.00
over 200 m <sup>2</sup> ***	15,200.00	16,900,00	17,500.00

Prices include excavation based on straightforward access for backhoe and CPAC 10-wheel truck to site, and level, well drained land, standard ceramic tiles, and 50cm sandwash deck all round. Matched pumps and filters.

The final cost will always depend on **your** choice of finish for the tiles and decking and whether you opt for a simple skimmer system or a balance tank system. Regular maintenance of your pool is not highly technical and you can easily do this yourself. However, as upcountry areas rarely have pool service firms, and if you plan on being away for extended periods, you may wish to include a higher level of automation in your pool system.

### **Options:**

Other tiles, finishes and decking, stainless steel ladders, spa systems, automatic water treatment systems, diving boards, slides and chutes, water features, landscaping, solar lighting... Please do not hesitate to ask.

### **Automatic pool management:**

In one compact unit, our computerised pool management system by Zodiac® with **three** essential features for maximum automation, saving you up to 90% of the time and cost of regular pool maintenance:

- Fully automatic salt water chlorination – no cost for chemicals
- Multi programme pumping and filtration cycle.
- Option: automatic acid feed for perfect pH level.

## Custom designed pools

### **Special Designs**

SiamConsulting will be pleased to provide a quotation for custom free-form, and special designs with waterfalls and other aquatic and lighting features, including landscaping suggestions. The consultation may incur a fee which will be fully refunded on confirmation of order.

### **Commercial and Large Pools; Multiple Pools; Housing developments**

Solutions for any project stage can be offered for condos, hotels, resorts, housing projects and sport complexes. The consultation may incur a fee which will be fully refunded on confirmation of order.

### **Design**

All our pools are designed in direct consultation with our clients. Our aim is to remove the 'luxury goods' price label from pools, thus bringing pool ownership within reach of more modest budgets. We are officially accredited agents for several leading brands of materials and equipment. Show us your basic design idea and we will tell you if it is feasible and how much it will cost. We can

provide a cost breakdown enabling you to choose to take on some of the work yourself, or with your own team of trusted labour. We can of course provide any level of help. We can also offer a complete turn-key solution. Either way, whether you would like a dip-pool for the kids or a very large commercial pool for your hotel or resort, you will make **significant savings**.

We can always send you a preliminary estimate, but there are often unexpected extras involved with building a pool, therefore a visit to your site is essential to be able to give an accurate firm quotation. These extras could be due to special engineering for pools on sloping or very uneven ground, or construction sites with limited access for large vehicles. For example, sometimes a garden wall may need to be partly demolished and rebuilt, or perhaps the garden will need re landscaping. Underground services such as electricity, water mains, and drainage may have to be rerouted, or special solutions may be needed for locating the pumping and filtration machinery

### **Consultation:**

Quotations for standard designs are free. For special projects, we may charge for consultation, but these costs are refunded on confirmation of order. Sometimes the distance may involve a surcharge, especially on islands and in remote areas, and the cost of locally sourced construction materials, can vary significantly in different parts of the country.

Our solutions are **always extremely competitive** without any compromise in quality.

### **DIY Solutions – save up to 50% on the cost of your pool!**

For the competent DIY enthusiast, SiamConsulting can offer a complete package that includes one site visit, drawings, material lists and full construction instructions, and the supply and delivery of all technical and maintenance equipment. SiamConsulting can provide additional support throughout your project. Manufacturer's guarantees support on equipment are valid and additional guarantees apply if installed and set up by SiamConsulting.
